

SOUTH TRAIL TIMES

Volume 6 / Issue 2

FEBRUARY EDITION:

Proper tire care can help save you money

- Checking tire air pressure, and regular tire maintenance such as rotation, alignment and inspections can help you save money.

It can extend the life of your tires so you don't have to buy as often

Simple things like checking your tires' pressure to make sure that they are properly inflated can make a real difference in how long your tires last. Under or over-inflated tires don't wear evenly and won't last as long. For example, a tire that is consistently 20% under-inflated can last 20% less. That means a tire that should normally last 60,000 miles would be worn out by 48,000 miles. Also, since the front and rear axles and right and left sides of your car wear down your tires differently, rotating your tires regularly between the different positions will ensure they wear evenly and last longer.

It can save you money on fuel

- Under-inflated tires are one of the biggest causes of using excess fuel.
- Under-inflated tires have higher rolling resistance, which means it takes more effort from the engine to move your vehicle.

Spending a little on your car now can save you more later

Don't forget the Flowers & Chocolates!!! Our technicians have a sweet tooth this time of year ☺
