

Proudly Serving Ft. Myers for 36 Years!

SOUTH TRAIL TIRE & AUTO REPAIR

"Where Quality Isn't Expensive, It's Priceless"

5751 Youngquist Road Ste B • FT MYERS FL 33912 • (239) 433-4241 • www.southtrailtire.com

With Thankful Hearts

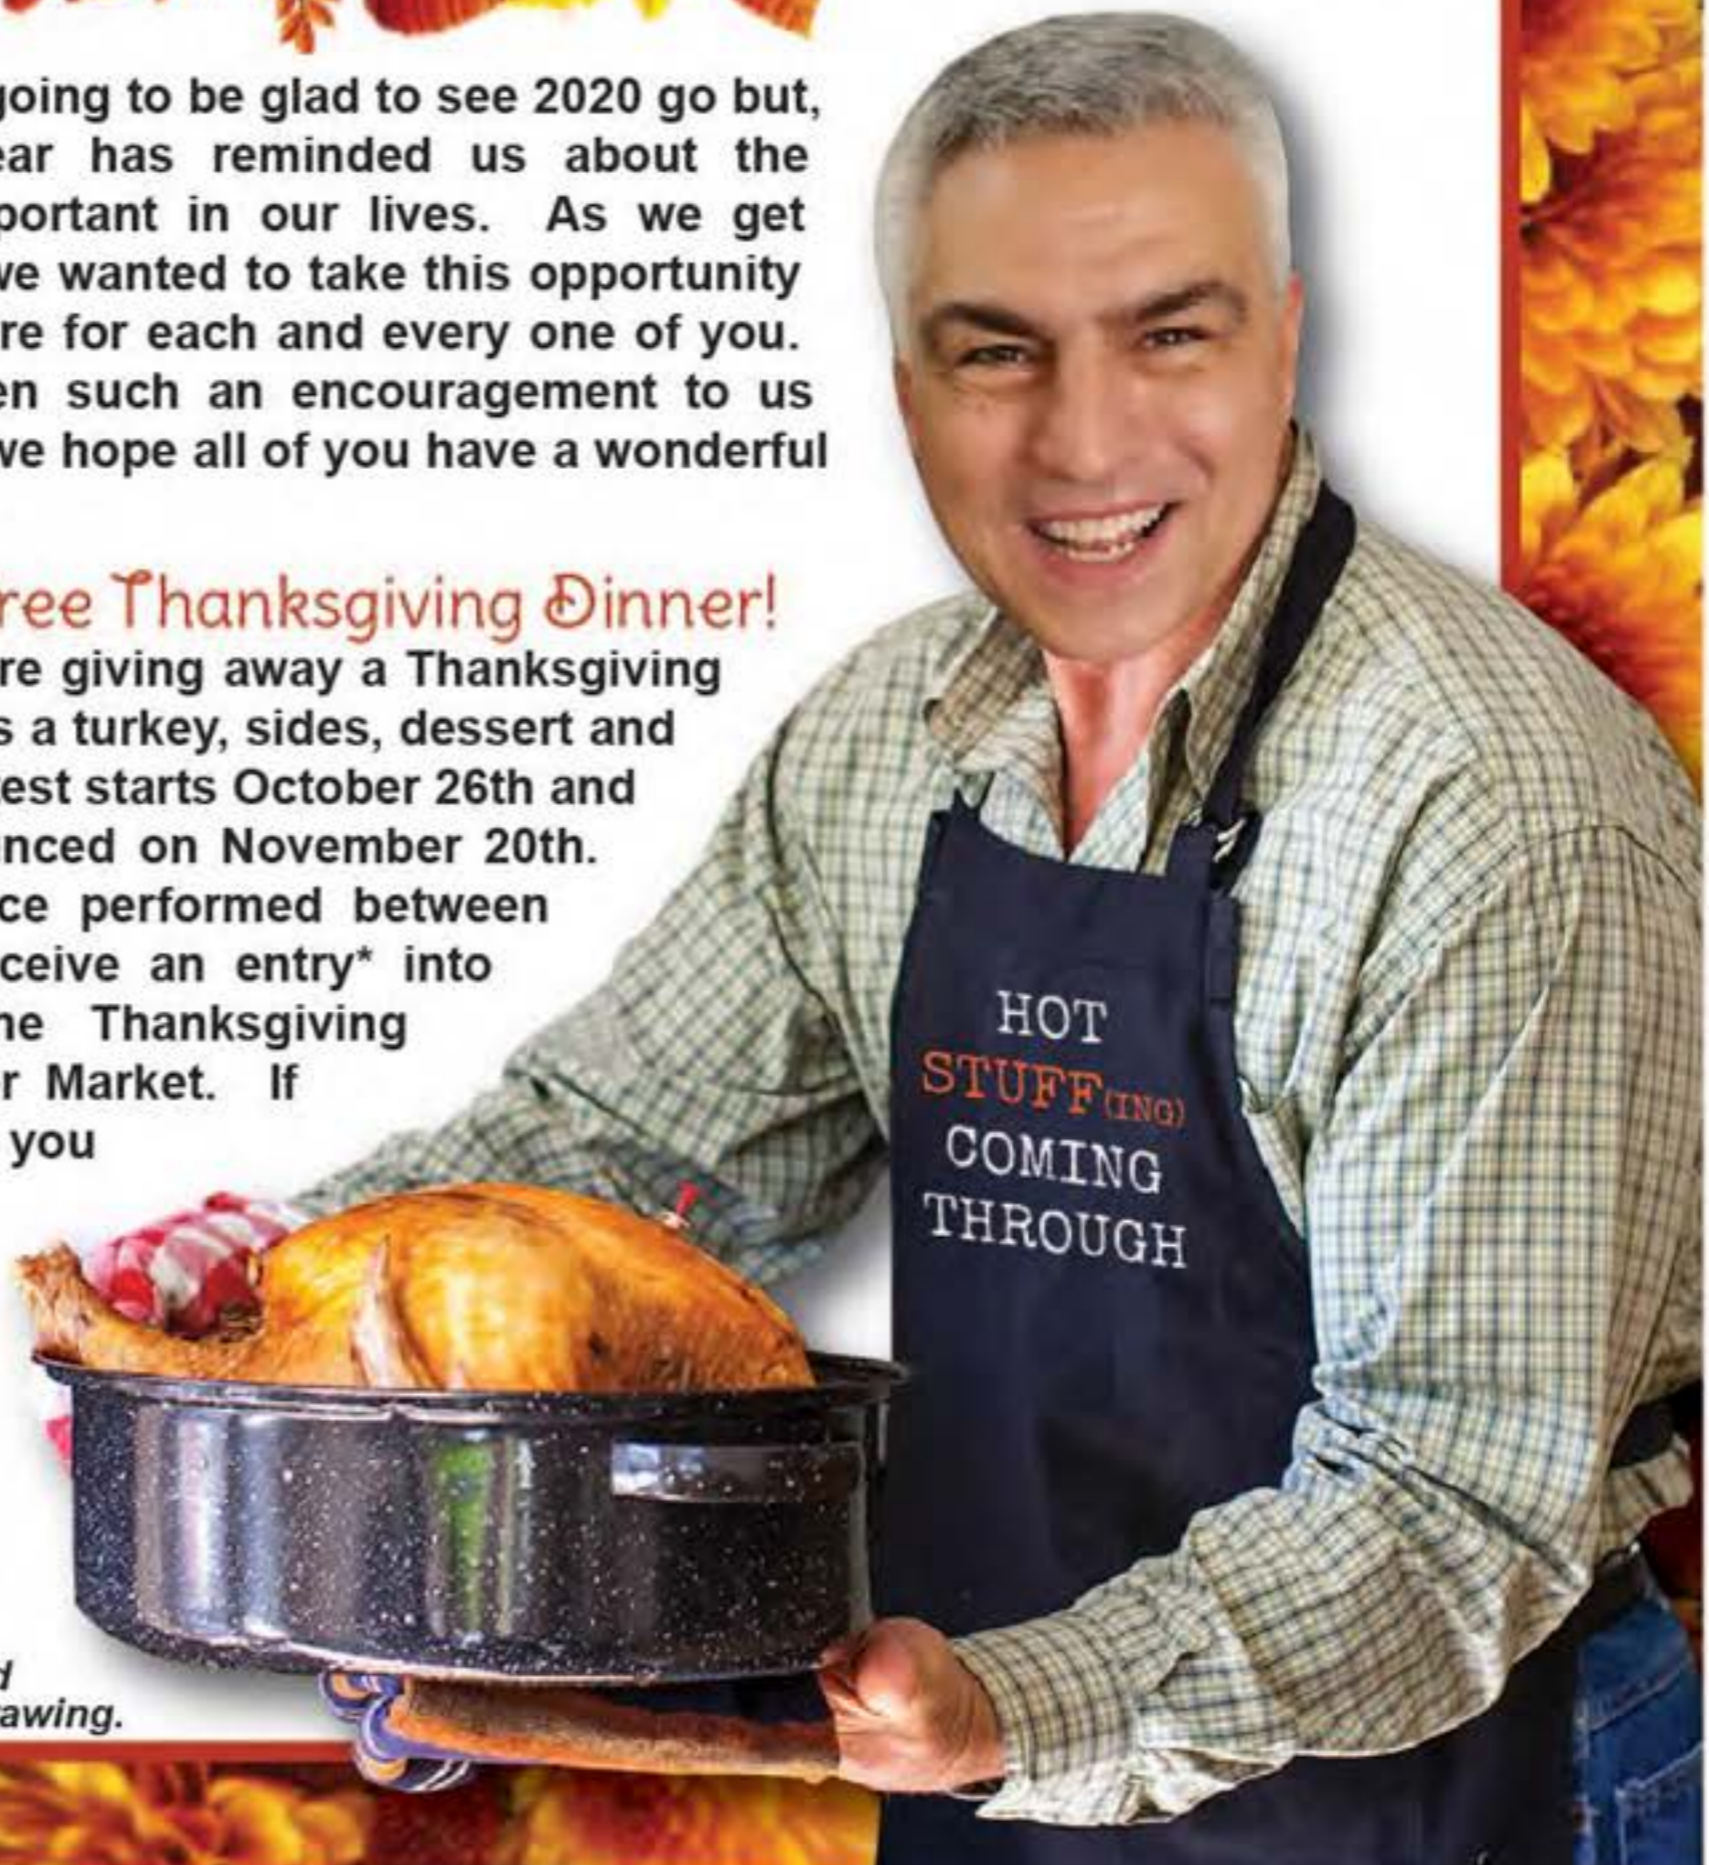

We know most of us are going to be glad to see 2020 go but, if nothing else, this year has reminded us about the things that are truly important in our lives. As we get ready for Thanksgiving, we wanted to take this opportunity to say how thankful we are for each and every one of you. Our customers have been such an encouragement to us throughout the year and we hope all of you have a wonderful Thanksgiving!

You Could Win A Free Thanksgiving Dinner!

Once again this year, we're giving away a Thanksgiving dinner for 12 that includes a turkey, sides, dessert and a bottle of wine. The contest starts October 26th and the winner will be announced on November 20th. For every \$100 of service performed between those dates, you will receive an entry* into the drawing to win the Thanksgiving dinner from Publix Super Market. If you are the lucky winner, you can pick up your free dinner from our shop on Thanksgiving Eve and you'll be all set for the big day. *Good luck to all our customers... old and new!*

Johnny Z

*Example: A \$500 invoice would be equal to 5 entries into the drawing.

Clogged Filters

When your filter gets full of debris, it can't do its job. It is how a human with asthma must feel! Most of us know we need to change the filters in our homes but some might not realize that they also need to change the filter in their cars. In vehicles built in 2007 and later you will find 80 percent of them have a cabin air filter and its function is to protect drivers and their passengers from contaminants such as pollen, mold spores, dust and other small and annoying particles.

Sludge

This is similar to clogged arteries! It is actually a gooey, tar like substance that deposits itself inside your car's engine. One of the roles of motor oil is to keep your engine cool so it has to be able to take the heat...when it fails to do so these deposits form in the engine. Some vehicle's engines have more trouble than others due to poor design. Their passages are smaller and they actually bake the oil inside the engine.

IT'S KIND OF
LIKE THAT!

In many ways, our vehicle's health system is a lot like our human makeup!

Seriously!

Smoke

We all know by now how bad smoking is for human health. When your car has a smoking issue, it is literally telling you to pay attention...it needs help!

Black Exhaust Smoke

means the engine is burning too much fuel. The first thing you should check is your air-filter and other intake components like sensors, fuel injectors and the fuel-pressure regulator.

Blue Smoke

is a clear sign that the engine is burning oil. What happens is that the valve guide seals or piston rings are worn out, and oil is leaking past from where it should be lubricating the moving parts, to the combustion chamber where it's being burned up with the fuel.

Gray Smoke

can mean that the car is burning oil or suffering from a bad turbocharger. It can also be an issue with your automatic transmission fluid getting burned up in the engine or could mean a stuck PCV valve.

We are here to keep your car up-to-date on all its medical/mechanical needs!
